EXPERIENCE

100Devs, Remote — *Full stack Software Engineer*

Sept 2022 - PRESENT

- Collaborated with teams of developers to design and build responsive full stack web applications using agile best practices with JavaScript, React, MongoDB, and Node.js and utilize complex and simple API's
- Built 10+ semantically structured and responsive full stack web applications for mobile & desktop devices
- Maintained detailed documentation and git history for all projects and used GitHub in a team environment
- Finished 50+ coding challenges (Leetcode, HackerRank, CodeWars)

Recent Projects:

Hip Coffee Co (Full stack Web App) – Cashier can take coffee orders from customers with their names. Baristas can login to the app and see orders that have been made, mark them as complete. Orders that have been completed will note which barista completed their order.

Happy Notes (Full stack Web App) – Users can login to their profile and find their list of notes. They can add new notes through an input, which they can then edit or delete all notes in their profile.

100 Hours Project – Completed 100 Days of coding and pushed to GitHub.

Other Projects- Small Lakes Casino Virtual Slot Machine, Los Angeles Star Gazers, Society APOD Web App with NASA API Integration, On-demand background changer for Partnered Twitch Streamer, and many more.
